

DOCKET NUMBER

PROD. & UTIL. FAG. 50-373,374

July 15, 1979

Mr. Wolfe
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Wolfe,

I am writing in regard to my concern over the LaSalle Nuclear Power Plant. I am strongly opposed to this matter and urge you to stop the Plant before it even begins operating.

The safety and licensing board can not ignore the concern about more radioactive waste being stored in our own back yards. As a citizen of the state of Wisconsin, the widespread damages could create future problems that would be as far reaching --- it is not just a concern for citizens of Illinois.

It will be easier to stop the LaSalle, Illinois Nuclear Plant before it starts operating. I hope that my concern will help focus further attention on the waste storage hearings - and stop this expansion.

Sincerely,

Kathryn A. Meetz
