NRC PUBLIC DOCUMENT

In the Matter of

COMMONWEALTH EDISON COMPANY

(Braidwood Nuclear Power Station,
Units One and Two)

) Docket Nos. 50-456
) 50-457
) License to Operate

AMENDED PETITION

In accordance with 10 CFR Section 2.714(b), petitioners are hereby amending their petition for leave to intervene, filed 15 January 1979.

PARTIES INVOLVED

A. Individuals

The individually listed petitioners, Bridget Little Rorem, Ralph Rorem, Jr., Phillip Zediker, Carole Zediker, and Dianne Frothingham, all wish to remain as parties to the intervention.

B. Bailly Alliance-Illinois

Bailly Alliance-Illinois does not wish to be a party to the intervention.

C. Appleseed

Appleseed is a Braidwood-area organization concerned with problems associated with nuclear power and its relationship to the environment.

7909250

711

G

1027 094

All of its members live within 25 miles of the Braidwood Plant. Granting of the license to operate the plant will affect the health and safety of Appleseed members

Appleseed wishes to be a party to the intervention in place of the Bailly Alliance-Illinois.

Ralph Rorem, Jr. and Bridget Little Rorem are members of Appleseed.

CONTENTIONS

Contention 1

Intervenor contends that an adequate emergency plan for the Braidwood Station should include the following:

- a) a program for informing the public within 25 miles of the Station of the means for obtaining instructions for evacuation or other protective measures in the event of a radiological emergency originating at the Station.
- b) assurance that institutions within 25 miles of the Station, such as the federal prison in Joliet, hospitals and nursing homes, can be evacuated or adequately protected in the event of a radiological emergency.
- c) a suitable plan for providing medical treatment to operating personnel who might be exposed to radiation in the event of an accident, including transportation to medical facilities equipped to treat radiation casualties.

Contention 2

Intervenors contend that Applicant is not qualified to operate the Braidwood Station because:

- a) its personnel do not have adequate technical qualifications.
- b) there is a shortage of technically qualified personnel which will be aggravated when Braidwood Station and other nuclear units now under construction come on line.
- c) Applicant's management has not demonstrated a sufficient commitment to the safe operation of nuclear power plants as is evidenced by the NRC fines and the consistent "C" rating on its Zion and Dresden plants.
