While shutdown in a cold condition, during the conduct of Operations Surveillance Test F-ST-12D titled "Radwaste Building Exhaust Monitor Instrument Functional Test" to satisfy the requirements of Technical Specification Appendix A, Paragraph 3.2.D.3, the "A" Radwaste Building Exhaust Monitor (17-RIS-458A) was found out of calibration. The redundant instrument (17-RIS 458B) was verified operable, therefore the event did not represent any significant hazard to the public health and safety.

The instrument was repaired, recalibrated and satisfactory operation was demonstrated by the successful completion of F-ST-12D on the following day.
