September 26, 1979

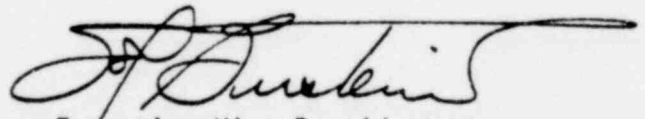

Mr. Harold R. Jenton, Director  
Office of Nuclear Reactor Regulation  
U. S. NUCLEAR REGULATORY COMMISSION  
Washington, D. C. 20555

Dear Mr. Denton:

SCHEDULE FOR RESPONSES TO IE BULLETINS  
AND NUREG-0578 REQUIREMENTS  
POINT BEACH NUCLEAR PLANT

During the last several months we have received a number of bulletins from the Office of Inspection and Enforcement which require substantial review and analysis on the part of the licensee. We have also recently received your September 13, 1979 letter requesting our commitment to comply with the recommendations of NUREG-0578 within 30 days. We are presently reviewing our current efforts in response to these regulatory requirements and would appreciate the opportunity to discuss with you our schedule for responding to these several regulatory requirements. We would like to schedule such a meeting at your earliest convenience and will contact the NRC Project Manager for Point Beach to arrange a convenient date

Very truly yours,

Executive Vice President

Sol Burstein
