EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 | During normal operation a radioactive liquid waste release was made that did not
0 3 | comply with all requirements of LCO 4.8.2. The flow switch which is intended to
0 4 | terminate the release if circulating water blowdown (used for dilution) is below the
0 5 | required value was not set for the proper flow rate. The blowdown flow rate was
0 6 | proper during the release and there was no effect on the health and safety of the
0 7 | public.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 The cause of this event was operator error in failing to reset the flow switch to

1 1 the new required flow rate. The operators involved were admonished and the governing

1 2 procedure modified to require that the flow switch setpoint be reset and verified

1 3 prior to a liquid waste release if required by the release form.
