

VIRGINIA ELECTRIC AND POWER COMPANY, RICHMOND, VIRGINIA 23261

November 2, 1979

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
Attn: Mr. O. D. Parr, Chief  
Light Water Reactors Branch No. 3  
Division of Project Management  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Serial No. 856/101179  
PSE&C/GLP:mac:wang

Docket No. 50-339

Dear Mr. Denton:

ENVIRONMENTAL QUALIFICATION OF CLASS 1E  
INSTRUMENTATION AND ELECTRICAL EQUIPMENT

We have reviewed your request for additional information dated October 11, 1979 and we have developed a schedule for providing the requested information.

We are presently working on the table which you requested to be filled out for 1E equipment. We will complete this table for in-containment equipment and submit the information no later than December 17, 1979.

The above schedule allows sufficient time for all parties to assemble the required information; i.e., A.E. and NSS supplier, and for us to review all submittals to insure ourselves that they are accurate.

As we indicated in a November 1, 1979 telecon with Messrs. Dunning and Satterfield, we will revise our 79-01 submittal to clarify some of the equipment identification and location information. This work will be completed as soon as possible; i.e., no later than December 17, 1979.

If you seriously consider that the proposed schedule will actually delay issuance of an operating license for North Anna Unit 2, please contact this office immediately.

Very truly yours,

Sam C. Brown, Jr.  
Senior Vice President - Power Station  
Engineering & Construction

cc: Mr. James P. O'Reilly, Director  
Office of Inspection & Enforcement  
Region II
