Docket Nos.: STN 50-546
STN 50-547

Construction Permit Nos.: CPPR-170
CPPR-171

Marble Hill Nuclear Generating Station, Units 1 & 2

Dear Mr. Keppler:

Public Service Company of Indiana, Inc. (PSI) has received the following letter and IE bulletins:

1. Letter from Light Water Reactors Branch #4, Division of Project Management, on the subject of "Secondary Water Chemistry Control", dated August 1, 1979.
2. IE Bulletin #79-20, "Packaging, Transport and Burial of Low-Level Radioactive Waste", dated August 10, 1979, from the Division of Fuel Facility and Materials Safety Inspection.
3. IE Bulletin #79-24, "Frozen Lines" dated September 27, 1979, from your office.

PSI wishes to confirm our understanding of the above documents. With regards to the NRC letter, it is PSI's understanding via discussion with Mr. Jerry Wilson of the NRC's Project Management personnel on Marble Hill, that this letter was transmitted to PSI by mistake and that no response and/or action is required by PSI. Concerning IE Bulletin #79-20, Mr. Schweibinz of your office informed PSI that no response and/or action is required by PSI but that the bulletin was sent to PSI for informational purposes. PSI has also discussed with both Messrs. Schweibinz and Wilson the applicability of IE Bulletin #79-24 to PSI. PSI believes that no immediate action is required; however, Mr. Wilson would appreciate some information on the subject of this bulletin in the future.
