Subject: Removing a location of use from your license
Date: Monday, August 19, 2019 10:37:00 AM

Good Morning Jim,

As we discussed on the telephone, I will need some additional information to complete the removal of a location listed on your license. Please provide a signed and dated response letter which includes the following:

- a list of the gauges (including the serial numbers) that have been stored at this location
- a discussion of the historical leak test data (have you ever had a leaking gauge at the location?)
- a statement that all of the radioactive material has been removed from the location, and provide the location where they are currently being stored
- the most recent leak test results for all of the gauges stored at that location

Please be aware that you cannot store radioactive material at your new facility until this amendment has been issued. You can submit a signed and dated letter to me as an email attachment or you can provide a fax to (630) 515-1078. Please let me know if you have any additional questions.

Thank You,

Erin Kennedy
