Mr. Joseph Hendrie, Chairman
U.S. Nuclear Regulatory Commission
Washington, D.C.

Dear Mr. Hendrie:

I live in the immediate area of the Hartsville Nuclear Plant (world's largest) now under construction. I would like information on the NRC's safety requirements which relate to residents in the immediate area. I specifically want to know the policy about evacuation of the area, requirements of road conditions in the immediate area (one to four miles), alert plan, etc.

Sincerely,

James H. Stewart, Ed.D.
