

June 2, 1979

Mr. Harold Denton  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

*Rose*

Dear Mr. Denton,

We, the undersigned citizens of Pennsylvania are outraged that you are meeting with GPU officials on June 11, 1979 to discuss the projected start-up of the TMI Reactor I in late August.

We are vehemently opposed to the opening of Reactor I at TMI at any time in the foreseeable future. We appeal to you as a man of conscience to consider the deleterious health effects (emotional, physical and mental) which will undeniably result from the opening of Reactor I and to delay even the discussion with GPU officials about the opening until the recommendations of the President's Commission on Three Mile Island and other groups studying TMI are known and affirmative action is taken on the recommendations.

Your cooperation in this most serious matter will be sincerely appreciated.

Sincerely,

**POOR ORIGINAL**
