**SUBJECT: VOID LETTER CONCERNING APPLICATION FOR LICENSE AMENDMENT,
CONTROL NO. 611898**

Dear Mr. Linard:

This concerns the subject application for an Amendment to your material license and our letter in which we notified you that the application was deficient, and that certain additional information was required.

By letter on April 2, 2019, you notified the agency that you have not conducted any principal activities for a period of 24 months, in accordance with 10 Code of Federal Regulations (CFR) 30.36(d)(3), because of economic downturn and requested authorization to place your radioactive material (RAM) in storage. On June 24, 2019, the agency requested additional information and sent you: 1) a Possession Only- Standby (POL) Operations Checklist to submit the required information for our review that outlined the procedures your facility would follow that demonstrated the procedures were in accordance with regulatory and license requirements to secure the RAM in storage; and 2) NRC Form 314, Request for Termination, in the event that your company decided to terminate your NRC radioactive materials license.

Your June 27, 2019 response letter notified the agency that you were retracting the April 2, 2019 letter and that your company intends to transfer the RAM to another authorized licensee and will request termination at that time.

The NRC therefore concludes that you are no longer pursuing this application for an amendment. Therefore, you are hereby notified that this application for an amendment has been voided without prejudice. This action is without prejudice to the resubmission of an application.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/
