Director of Nuclear Reactor Regulation
Attention: Mr. Brian K. Grimes
Acting Assistant Director for
Systems Engineering
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Grimes:

In the Matter of the)	Docket Nos. 50-259
Tennessee Valley Authority)	50-260
		50-296

By my letter dated September 21, 1979, TVA responded to your request for additional information concerning Target Rock safety-relief valves for Browns Ferry Nuclear Plant. This letter is to inform you of a typographical error that exists in the enclosure to my September 21, 1979, letter. The answer to question 1.b. reads, "The existing simmer margin of the three-stage valve assemblies is equal to the operating pressure (approximately 900 psig). . . ." The answer is corrected to read, "The existing simmer margin of the three-stage valve assemblies is equal to the operating pressure (approximately 990 psig). . . ."

We regret any inconvenience this error might have caused. If we can be of further assistance, please get in touch with us.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Regulation and Safety
