Subject: NRC Approval of Revised Figure 3 for Classified Distributive Information Network Drawings, GLEP-00023-R, Rev. 8.4
Date: Monday, September 09, 2019 3:21:00 PM

Pat,

The NRC, in consultation with the DOE Oak Ridge Office, has completed the review of your Classified Distributive Information Network Drawings change submitted via GLE-2019-0099 letter dated June 12, 2019 (ML19171A194). The DOE's walk down of the proposed change in the GLEP-00023-R, Revision 8.4, figure 3 of 5, indicated that the update is accurate and acceptable. Therefore, based on the walk down, the DOE review, and NRC's review of the figure, the proposed revision to the CDIN, GLEP-00023-R, Revision 8.4, is approved.

I estimate this review required 2 hours of NRC time which has been charged to the Project Management charge code (EPID: L-2019-PMP0022). The code will remain open for routine charges related to GLE. Note: The DOE walkdown was conducted as part of the Information Security routine inspection conducted with Region II.

Sincerely,

Matt Bartlett

Subject: [External_Sender] RE: Question about CDIN Change

Matt, as Jim has stated, I reviewed the revised CDIN during the recent GLE INFOSEC inspection with Region II. The revision to GLEP-00023-R Revision 8.4 is acceptable and you can inform GLE of my approval.

Let me know if any questions.

Randy
