Director, Nuclear Reactor Regulations
Attn: R. W. Reid, Chief
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit I
Operating License No. DPR-50
Docket No. 50-289
Cask Drop Evaluation

Per our letter of August 21, 1979 (GQL 1058), Met-Ed committed to submit an analysis of loads and load height in the area north of the tracks where the possibility exists for damaging circuits of two colors. Met-Ed is requesting an extension until March 1, 1980 to submit the analysis. This request is prompted by the need to work on restart items and that there are no plans to ship spent fuel prior to March 1980.

Sincerely,

J. G. Herbein
Vice President
Nuclear Operations
