Dear Mr. Smith

I am very pleased with the response
my letter to the Nuclear Regulatory Commission
has generated. It is encouraging to know that
my opinion and the opinion of others like
me is taken into consideration.

Mr. Ross's letter to me dated July 6
adequately explained to me, in layman's terms,
the precautions taken before the Kewaunee
Plant happened. D.B.I. The incident
at Three Mile Island was alarming but
it also questions the overall safety of
these power plants. How much radiation
leaks out of these plants. How much
information is withheld from the public?
Thank you to Mr. Ross or Mr. Lindner

move to a neighborhood that is within walking distance of one of the Nuclear Power Plants. Is it safe to eat the fish caught in the lakes around the power plants? Is it safe for our children to grow - grows close to Davis-Besse? Are you and Polite Editor - CEI being truthful about the amount of radiation seeping from these plants?

I would like to participate in any hearing on the matter. If the hearings are close to my home - yes I would be happy to. However, I have a baby who is three years old which that I have to care for. And unlike any big business that may have an interest in these nuclear power plants, I do not have the funds available to attend any sort of town hearings.

I am hoping that my public official
will voice my opinion in my place.
Thank you for all the information I have
been receiving. If I can participate
by mail in any way, please contact
me. (I will be out of town the first
week in August)

Sincerely -
Gus Dibelyak

Dear Mr. Smith:

I am very pleased with the response my letter to the Nuclear Regulatory Commission has generated. It is encouraging to know that my opinion and the opinion of others like me is taken into consideration.

Mr. Ross's letter to me dated July 6 adequately explained to me, in layman's terms, the precautions taken before the Davis-Besse Plant reopened DB-I. The isolated incident at Three Mile Island was alarming but I also question the overall safety of these power plants. How much radiation leaks out of these plants. How much information is withheld from the public? Would you, or Mr. Ross or Mr. Hendrie move to a neighborhood that is within walking distance of one of the Nuclear Power Plants. Is it safe to eat the fish caught in the lakes around the power plants? Is it safe for our children to grow - living close to Davis-Besse? Are you and Toledo Edison - CEI being truthful about the amount of radiation escaping from these plants?

You asked if I wish to participate in any hearings on the matter. If the hearings are close to my home - yes I would be happy to. However, I have a baby and a three year old child that I have to care for. And, unlike any big business that may have an interest in these nuclear power plants, I do not have the funds available to attend any out of town hearings.

I am hoping that my public official will voice my opinion in my place. Thank you for all the information I have been receiving. If I can participate by mail in any way, please contact me. (I will be out of town the first week in August)

Sincerely -

/s/ Jean Debeljak
