POST OFFICE BOX 784

COLUMBIA, SOUTH CAROLINA 29218

E. H. CREWS, JR.
VICE-PRESIDENT AND GROUP EXECUTIVE
ENGINEERING AND CONSTRUCTION

October 12, 1979

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395

Dear Mr. Denton:

South Carolina Electric & Gas Company, acting for itself and as agent for South Carolina Public Service Authority notifies the Commission that the value given for the concentration of suspended solids (40 mg/l) is incorrect and should read 30 mg/l. This information is found in Section 3.7.1 of the Operating License Environmental Report for the V. C. Summer Nuclear Station and will be corrected with the next amendment to that document. You are being notified of this change as a result of comments received from the U. S. Environmental Protection Agency concerning their review of the draft Environmental Impact Statement for this facility.

Sincerely yours,

E. H. Crews, Jr.
