Reference: Houston Lighting and Power Company  
Allen's Creek Nuclear Generating Station, Unit 1  
Docket No. 50-466

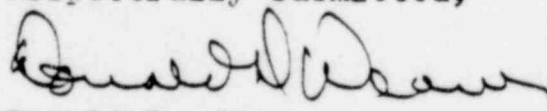

Dear Sir:

With reference to my letter of August 21, 1979, I wish to amend the submitted petition for leave to intervene to include the following contentions:

1. I live in the Valley Lodge subdivision of Simonton, Texas, within a few miles (less than 15) of the proposed Allen's Creek Nuclear Plant. My family and I will be adversely affected by radioactive emissions from this plant.
  - a. Potential health hazard to wife, children and myself.
  - b. Potential decrease in the value of our home and property.
2. The proposed cooling lake will increase the probability of a Brazos River overflow, increasing the danger of flooding of my property.
3. Alternative locations may not have been adequately considered following the reduction in size of the proposed Allen's Creek site. The Allen's Creek site is close to a rapidly growing area (metropolitan Houston). The population center of this metropolitan area is moving west, toward the proposed site. Within the projected lifetime of the facility (40 years after start up) the population of the metropolitan area may reach ten million; and the center of the projected population will shift significantly toward the site.

Thank you for your consideration in this matter.

Respectfully submitted,

Donald D. Weaver
