Mr. A. Schwencer, Director
Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

RE: Changes to Operating License No.
NPF-2 Technical Specifications

Alabama Power Company proposes the attached changes to Joseph M. Farley Nuclear Plant Operating License No. NPF-2 Technical Specification involving the following items:

1. Technical Specification Table 3.7-4 concerning corrections to the list of safety related hydraulic snubbers. This is a pro forma change to update technical specifications to reflect actual plant configuration which is considered a Class II change according to 10 CFR Part 170.
2. Technical Specification Section 6.12 concerning administrative controls of high radiation areas. This is an administrative change which is considered as a Class III change according to 10 CFR Part 170.

The Plant Operations Review Committee and the Nuclear Operations Review Board have reviewed the above proposed change and have determined that the changes do not involve an unreviewed safety question as shown in the attached safety evaluation.

The class of each item in this proposed amendment is designated according to 10 CFR 170 requirements. A check for \$5,200 is enclosed to cover the fees required.

In accordance with 10CFR50.30(c)(1)(i), three (3) signed originals and thirty-seven (37) additional copies of this proposed amendment are enclosed.

If you have any questions, please advise.

Yours very truly,

F. L. Clayton, Jr.
