EDWIN I. HATCH NUCLEAR PLANT UNITS 1, 2
OUTSTANDING LICENSING SUBMITTALS

Gentlemen:

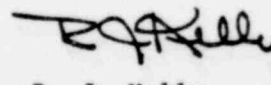

Your letter of August 20, 1979, requested Georgia Power Company to assign a priority to the items listed in the attached list as outstanding licensing submittals.

Two items should be noted with regard to the attached list:

1. Schedule is very important in our proposal to increase the spent fuel storage capacity; any delays could cause unnecessary exposure during the storage pool expansion.
2. We have resubmitted a revised proposal on the Drywell-Suppression Chamber Vacuum Breaker item.

The attached list has been discussed in some detail with our NRC Project Manager. If there are any questions about our markup, please let us know.

Very truly yours,

R. J. Kelly

POOR ORIGINAL

LICENSEE INITIATED AMENDMENT REQUESTS

HATCH NUCLEAR PLANTS UNIT 1 AND 2

<u>Unit</u>	<u>Title</u>	<u>Date of Application</u>	<u>Category</u>
1	APRM Rod Block and Scram Curves	5/8/75	C
1/2	Core Maximum Fraction of Limiting Power Density	10/18/78 and 6/5/79	C
1	End-of-Cycle RPT	3/22/79	B
1/2	Spent Fuel Pool Capacity	7/9/79	A
1/2	Annual Environmental Report	7/12/79	D
2	Administrative Changes	7/19/79	D
2	Drywell-Suppression Chamber Vacuum Breakers	7/27/79	C
1	Overhead Crane Specs	9/15/79	E

Legend:

Category A - This is an item of extreme importance due to the need to maintain an expedited schedule. Any delays beyond the schedule proposed increases difficulty of task.

Category B - This item must be completed 2000 MWD/T before the end of cycle.

Category C - These items cause operational difficulties in their existing form. The proposed changes would provide improved operating flexibility.

Category D - Routine.

Category E - This item is a routine request which can be disposed of with the package on the spent fuel pool expansion.
