UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION
BEFORE THE ATOMIC SAFETY AND LICENSING BOARD

In the Matter of
METROPOLITAN EDISON COMPANY,
et al.,
(Three Mile Island Nuclear
Station, Unit No. 1)

Docket No. 50-289

AMENDMENT TO INTERVENTION

On September 18, 1979, the Atomic Safety and Licensing Board announced procedures for filing petitions and amendments to intervene prior to the opening of Three Mile Island, Unit 1. The final date for amendments was listed on Page 2 as October 22, 1979.

When I originally petitioned the Nuclear Regulatory Commission to intervene, I was not aware of so many ground rules. Therefore, this is an amendment to my original intervention and a specific request to alter the response from the Atomic Safety and Licensing Board indicating there would be "no objection" to my intervention pursuant to 10 C.F.R. 2.715 (a) by Metropolitan Edison Co. (limited appearance).

The purpose of my petition to intervene is not emotional rhetoric but to present before the Board relevant and substantiated evidence prior to the rendering of a final decision for reopening Unit 1. Therefore, it is vital that my status be altered from 10 C.F.R., 2715 (a) (limited appearance) to 10 C.F.R. 2.714 (a) (litigation).

October 15, 1979

Petition to intervene pursuant to 10 C.F.R. 2.714 (a) instead of 10 C.F.R. 2.715 (a). (please note this request for change).

Request to intervene flows from Section 189 (a) of the Atomic Energy Act, 42 U.S.C. 2239 (a) that requires the Commission to admit as a party "any person whose interest may be affected by the proceeding." Pursuant to this, I wish to intervene on behalf of myself on the following contentions:

1. I reside within three miles of Three Mile Island.
2. Medical and Environmental information indicating the feasibility or prudence of pursuing the operation of nuclear power at the Three Mile Island Station.
 - a) Birds
 - b) Farm Animals
 - c) Plant Life
3. Malfunctions of Unit 1 prior to the Unit 2 accident.

I will take the position that any resumption of nuclear power plants in the vicinity of Three Mile Island will intensify the on-going detrimental effects on the environment and animals. These adverse conditions will increase the degenerating health problems for the animals and eventually affect the human populous in the same area.
