Dear Sir:

I wrote you as an individual. I am a part of Paddlewheel Alliance, and I did want to reaffirm what they sent to you.

I asked for hearing (1) and for the hearing to include safety (2) and for construction to stop until all was hear + (3) proven safe. Some construction work may have to be redone, some torn up, some revised.

You did not include a copy of our petition in your letter which was sent to many people.

I've just read severe criticism of you (NRC) and your ability to take safety of nuclear power plants
