Environmental Qualification of Class 1E Equipment

Dear Mr. Denton:

Mr. R. L. Baer's letter of October 15, 1979, requested that Duke Power Company develop a schedule for providing additional information concerning the environmental qualification of Class 1E equipment. It is our intent to provide this information in three separate submittals. The breakdown of the Class 1E equipment to be addressed in each submittal and the schedule for providing this information is given below.

- | | |
|---|-------------------|
| 1. Equipment inside containment | December 17, 1979 |
| 2. Equipment outside containment exposed
to a high energy line break accident | January 17, 1980 |
| 3. Equipment outside containment not
exposed to a high energy line break
accident | April 14, 1980 |

It should be noted that meeting this schedule is contingent upon the satisfactory resolution of some outstanding questions regarding the qualification of equipment supplied by Westinghouse.

Very truly yours,

William O. Parker, Jr.
