Subject: [External_Sender] Docket No. PRM-50-117

To whom it may concern:

Despite negative public perception our nuclear plants both active and retired have a continued place in this country. I support reopening retired reactors provided there are rigorous inspections and scientific data supporting their safety. Although I do believe the probability of entities wishing to spend money to reopen retired reactors, I do not think we should prevent them from doing so, of course provided safety (nuclear, industrial, etc) are the priority.
