Importance: High

Patrick,

I am working on the amendment request for Hendricks Regional to add an AU for 35.100/200/392/394. However, the hours required for to 10 CFR 35.290 and 35.390 are not met. The preceptor signed off, did not date in places, showing it was not reviewed before being sent. Lastly, there was no verification included on the authorized uses of the preceptor and the license referenced is a broad scope.

Please resubmit the request in its entirety by September 12, 2019 in order to continue the review.

Thank you,
Daniel
