

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 10, 2019

LICENSEE: Energy Northwest

FACILITY: Columbia Generating Station

SUBJECT: SUMMARY OF AUGUST 28, 2019, CLOSED MEETING WITH ENERGY
NORTHWEST TO DISCUSS SAFEGUARDS AND SECURITY-RELATED
INFORMATION FOR COLUMBIA GENERATING STATION
(EPID L-2019-LRO-0066)

On August 28, 2019, a Category 1 closed meeting was held between the U.S. Nuclear Regulatory Commission (NRC) and representatives of Energy Northwest (the licensee) at NRC Headquarters, Three White Flint North, 11601 Landsdown Street, North Bethesda, Maryland. The purpose of the meeting was to discuss the licensee's planned changes to the current Physical Security Plan (PSP) for the Columbia Generating Station. The meeting notice and agenda are available in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML19238A128.

The licensee presented its plan to implement changes to the PSP under the provision of Title 10 of the *Code of Federal Regulations* (10 CFR) 50.54(p)(2) concerning background information and a summary of the basis and content of the planned changes. The NRC staff discussed the licensee's planned changes and indicated that the basis for justifying changes under the provision of 10 CFR 50.54(p)(2) should be clearly captured in the licensee's report of security plan changes submitted to the NRC. The licensee did not request any regulatory decisions or commitments at this meeting, nor did the staff make any regulatory decisions or commitments.

The information presented and discussed at this meeting were safeguards and/or security-related information which are protected in accordance with requirements of 10 CFR Sections 73.21 and 73.22 and 10 CFR 2.390, respectively, and are withheld from public release. A list of meeting attendees is enclosed.

As this was a closed meeting, members of the public were not in attendance. Please direct inquiries to me at 301-415-5136 or via e-mail at John.Klos@nrc.gov
