

docket nos. 50-387 & 50-388

January 23, 1979

James Perkins

Executive Director, American Nuclear Energy Society  
100 S. Allen Street  
State College, Pa. 16801

Dear Mr. Perkins:

I am writing to ask permission to make a limited appearance at the January 30 at the licensing hearing for Pennsylvania Power and Light's nuclear plant, the Susquehanna Steam Electric Station. For over three years ANES's information center and representatives have been assuring the public of the safety of nuclear power plants in general, and of the SSES in particular, often citing the executive summary of the Reactor Safety Study. Since you at the INEC have withdrawn your support of the summary, labeling it potentially "misleading" and "deceptive", I believe that ANES has the responsibility to notify all the groups to whom its representatives have spoken and all the people who have visited its information center, that the claims for safety made in the name of the Rasmussen Report are unsupported and may be incorrect. It may be the case that public acceptance of this project has been based on these baseless assurances.

Will you also please include my name on the service list for your mailings about the hearings on the SSES.

Thank you.

Sincerely,

*James Perkins*
