EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

While conducting a review of the periodic test program, it was discovered that surveillances 4.3.1.1.1 (Table 4.3-1 Item 16), 4.3.2.1.3 (Engineered Safety Features [ESF] Pumps Only) and 4.8.2.3.2.c and d had exceeded their surveillance interval. Because of more frequent inservice testing on ESF pumps, surveillance testing on station batteries and redundancy in reactor protection systems, the probable consequences of this event are minimal. The health and safety of the general public was not jeopardized.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

Due to the long period of time from preoperational testing to commercial operation, the required testing was overlooked. Each surveillance item will be met within 45 days of this report.

Description of Event

While conducting a review of the periodic test program, it was discovered that surveillances 4.3.1.1 (Table 4.3-1 Item 16), 4.3.2.1.3 (Engineered Safety Features [ESF] Pumps only) and 4.8.2.3.2.c and .d had exceeded their periodicity.

Probable Consequences

Because of more frequent inservice testing on ESF pumps, surveillance testing on station batteries and redundancy in Reactor Protection systems the probable consequences of this event are minimal. The health and safety of the general public was not jeopardized.

Cause of Occurrence

Due to the long period of time from preoperational testing to commercial operation, the required testing was overlooked.

Immediate Corrective Action

The required testing has been incorporated in the periodic test schedule to be completed within 45 days of this report date. An exhaustive audit of all surveillance items was conducted to ensure no other items were overdue.

Scheduled Corrective Action

Required testing will be completed in accordance with periodic test schedule.

Action Taken to Prevent Recurrence

Because of the nature of this event, no action to prevent recurrence is deemed necessary. To prevent this occurrence on Unit 2, an extensive audit of preoperational testing will be conducted to ensure testing frequencies are not exceeded.
