Subject: Pre-Service Inspection Plan
LaSalle County Units 1 and 2
NRC Docket Nos. 50-373 and 50-374

References (a): L. O. DelGeorge to O. D. Parr
dated December 8, 1978

(b): O. D. Parr letter to L. O. DelGeorge
dated January 10, 1979

Dear Mr. Parr:

Enclosed for review by NRC is the subject Pre-Service Inspection Plan for LaSalle County Station. This plan supercedes the submittal made in Reference (a) and addresses comments and guidance made by the NRC Staff in Reference (b).

Section 5.2.4 of the LaSalle County FSAR addresses the topic of inservice inspection. In addition, augmented inspection requirements have been committed in response to FSAR Questions 111.35, 111.49, 111.72 and 111.81. The Technical Specification commitment for inservice inspection of ASME Code Class 1, 2 and 3 components is delineated in Specification 3.4.8/4.4.8. Throughout the Pre-Service Plan that is enclosed, an asterisk is used to designate the augmented inspection requirements.

Commonwealth Edison will submit the In-Service Inspection Program (ISI) along with the results of the Pre-Service Baseline Program in July 1979, which is six months prior to the LaSalle Unit 1 commercial service date. This approach is in conformance with the applicable requirements of 10 CFR 50.55 and is considered necessary to allow for minor modifications to the ISI program to reflect the results of the pre-service baseline

inspection including possible changes to relief requests. The baseline results will also influence the ISI coverage schedule during the program's inspection interval. LaSalle Station procedures will identify the detailed ISI inspection schedule. In this regard, the radiologically "hottest areas" will be inspected early in the inspection cycle.

In the event you have any questions relative to the enclosed Pre-Service Inspection Plan, or the schedule defined for final submittal of the In-Service Inspection Plan, please direct them to this office.

One (1) original and thirty-nine (39) copies of this letter plus forty (40) copies of the LaSalle County Pre-Service Inspection Plan are enclosed for your use. Included as part of the Plan are color-coded piping and instrument diagrams which designate the code classification of the piping and components subject to inspection.

Very truly yours,

R. J. Naughton
