General Comment

Regarding NRC-2019-0155 use of the term "Enhancements" in the title is misleading as it Does Not mean weakening. We, the Public, and especially I as a person who lives within two miles of a Nuclear Power Plant, require stronger, more all-inclusive Safety Regulations not weaker more Corporate friendly regulations. We deserve more honest, thorough, and transparent reporting and no Rubber-Stamping of license renewal or extension applications. The public must be able to receive correct and adequate information on the safety status of our Nuclear Power Plants upon request of our Congressmen. This is an industry, with serious safety considerations, being run by humans who all inevitably make mistakes and the Public must be informed.
