Submitter's Representative: Shannon Kessler

Organization: Century 21 Hometown

General Comment

I support nuclear energy in California and the US. It seems that our state lacks foresight on this issue since we are increasing restrictions to the point of making it unfeasible for companies to operate in the field of certain types of energy when we lack adequate replacement sources. At a time when nations in Europe and across the world are increasing the number of nuclear plants, we are shutting them down. Nuclear is a clean and efficient form of energy that should be utilized. I have grave concerns about the lack of affordable utilities in California in the coming years and the reduction in high paying jobs connected to that industry. My family owns a construction company and we are already experiencing serious increases in energy and fuel costs that we must then pass on to our clients.
