Tomas,

Please use the measurements noted in the Manual. They are accurate and include the fittings which extend slightly out beyond the dimensions of the case.

Appreciate you asking for the clarification.

Thank you.

Bennett

Good morning Mr. Rubin,

As we were drafting the registration certificate we noted different external dimensions provided for the GC-IMS devices.

In the application package dated March 20, 2019 – page 3 of 12 in the WESTPAK attachment the dimensions were reported as 48 cm x 44 cm x 19 cm.

In your July 26, 2019 letter the instruction manual reported the measurements as height 184.5 mm, width 449 mm, and depth 495 mm.

The engineering drawing (6002010) in the March 20<sup>th</sup> application also indicated different dimensions.

Please indicate which dimensions we should use for the external measurements of the GC-IMS devices.

Thank you,
