Dear Sirs,

I feel the health and safety of Californians will be endangered if the Diablo Canyon Nuclear Power Plant is allowed to operate. I urge you as a concerned citizen to stop this form of energy before it becomes a menace to our generation and all that follow.

Before you make your decision, please look at the performance record of the nuclear industry. Failures and mishaps are common, who knows what consequences nuclear pollution will have on mankind.

A passionately urge you not to license the Diablo Canyon Nuclear Power Plant for operation.
