

NRC PUBLIC DOCUMENT ROOM  
IN THE MATTER OF

HOUSTON LIGHTING AND POWER COMPANY

(ALLENS CREEK NUCLEAR GENERATING STATION, UNIT 1)

Docket No. 50-466

\*\*\*\*\*

TO THE ATOMIC SAFETY & LICENSING APPEAL BOARD:

This is to notify the Atomic Safety & Licensing Appeal board that, pursuant to CFR 2.714 (a), I'm appealing the findings of the Atomic Safety & Licensing Board on my petition to intervene in the Allens Creek Nuclear Generating Station.

In pursuant to CFR 2.714 (a), I will file a brief supporting this appeal. Some of my contentions may not have held water (due to my inexperience in these matters and the short time to file contentions), but I am disappointed in the Board's dismissal of my contention 4, which I believe is very important to the outcome of the ACNGS.. This contention stated because of passage of Admendment 4 to the Texas Constitution, solar and wind energy equipment would be tax exempt. I contend this would encourage solar and wind power developement in the state of Texas, and present a feasible alternative to the ACNGS. I believe the Board's order denying this contention is premature, and will demonstrate why in my brief.
