Joseph M. Farley Nuclear Plant - Unit 2
Diesel Generators 1C and 1-2A
File: A-35.62.50
Log: 78-237

Mr. James P. O'Reilly
U. S. Nuclear Regulatory Commission
230 Peachtree Street NW - Suite 1217
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

Please find enclosed a copy of a problem with the swing diesel generators 1C and 1-2A and the river water pumps that we have evaluated in accordance with the NRC regulation 10CFR50.55(e). These problems were determined to affect the safety of the plant when Unit 2 is placed in operation, if they had remained uncorrected. These problems and corrective action were reported to you in our submittals of June 20, 1978, August 15, 1978, and October 16, 1978.

We are sending this report to combine the two problems and two corrective actions.

Yours very truly,

Alan R. Barton
