Alan Rosenthal, Esq., Chairman  
Atomic Safety & Licensing Appeal Board  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Rosenthal:

Please do not increase Vepco's foundation settlement allowance without a public hearing of the evidence as it affects all the structures at the North Anna Power Plant. Vepco has withheld information on faults and settling that are essential to the rational decision making process. There must be something illegal about treating a public issue of this grave nature like a private poker game. In light of Vepco's continued irrational truculence, a revocation of the North Anna Operating License may be the only method of gaining Vepco's respect and cooperation.

Very seriously yours,

and all my descendants for 250,000 years.

P.S.: Any license should be born by Vepco's stock holders and not Virginia consumers.
