

UNITED STATES OF AMERICA  
NUCLEAR REGULATORY COMMISSION

Before the Atomic Safety and Licensing Board

NRC PUBLIC DOCUMENT ~~1509~~ **1509P**

In the Matter of )  
PHILADELPHIA ELECTRIC COMPANY ) DOCKET NOS.  
(Fulton Generating Station, ) 50-463, 50-464  
Units 1 and 2) )

MOTION FOR LEAVE TO FILE  
OUT OF TIME

The attached "Opposition to Petition to Terminate Docket . . ." was due to have been filed on June 4, 1979. A one-day filing delay has resulted from the temporary interment and scrambling of major portions of its text, which was timely prepared in draft, in the memory of a new and still somewhat independent-minded word-processing system in the office of applicant's counsel. The "Opposition" is being served on the Board and all parties by Special Delivery rather than regular first-class mail, so as to compensate for any possible delay in its receipt by the Board and parties. The proceeding will thus not be delayed by this one-day delay in filing.

Good cause having been shown for the one-day delay in filing, and there being no prejudice to other parties therefrom, the Applicant hereby moves that the Board accept for filing the Applicant's "Opposition to Petition to Terminate Docket . . . ."

Respectfully submitted,

  
DONALD P. IRWIN

DATED: June 5, 1979

Attorney for  
Philadelphia Electric Company
