Mr. A. Giambusso
Deputy Director for Reactor Projects
Directorate of Licensing
Office of Regulation
U. S. Atomic Energy Commission
Washington, DC 20545

SUBJECT: THREE MILE ISLAND UNITS 1 AND 2
DOCKET NOS. 50-289 AND 50-320
QUALITY ASSURANCE ORGANIZATION

Dear Mr. Giambusso:

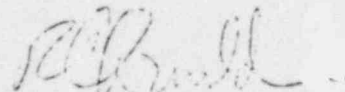

In the AEC letter of January 22, 1974, we were requested to provide you with information so that you may determine "if quality assurance personnel have sufficient authority and organizational freedom to perform their critical functions effectively and without reservation".

We believe that the Quality Assurance personnel assigned to these projects do have the necessary authority and organizational freedom. We also believe that the subject dockets contain the necessary information to allow the AEC to make a positive determination on this question.

For Unit 1 (Docket 50-289) the enclosed amendment (45) identifies the references in the FSAR where the information is contained. The amendment also contains clarifying notes where they were deemed necessary. Five copies of the amendment are enclosed, the remainder are being shipped under separate cover.

For Unit 2 (Docket 50-320) exactly the same Quality Assurance philosophy applies. However, since we intend to submit the FSAR within the next week we would like to defer our reply. It is expected that your "mini-review" of the FSAR would identify any questions that you may have in this area. If any additional information is necessary, we will supply it along with our reply to other "mini-review" questions.

Very truly yours,

R. C. Arnold
Vice President
