EF2 110 AIB
6400 North Dixie Highway
Newport, MI 48166

Dear Mr. James:

I have received the submitted NRC Form 314, "Certificate of Disposition of Materials," dated September 27, 2019, in which you have requested termination of U.S. NRC Radioactive Material License No. 21-02335-08. Before further action may be taken on the request, please respond with the following information:

Upon review of the submitted Leak Test Report, it appears that the Leak Test Samples were collected (as per the reference to survey date) on August 5, 2019 and then counted on August 8, 2019. The Leak Test Report was prepared and signed on August 9, 2019.

The first signature field at the bottom of the Leak Test Report appears to conflict with the above summary in that the report appears to identify that the Leak Test Samples were collected (or obtained) on August 9, 2019. Please confirm that the above summary correctly identifies that the Leak Test Samples were collected on August 5, 2019, which were counted on August 8, 2019 with the results being reviewed on August 9, 2019.

For your reference, the program specific guidance for your license is NUREG-1556, Volume 1, Rev. 2 dated June 2016. This guidance is available on the NRC Web site at: <https://www.nrc.gov/docs/ML1617/ML16175A375.pdf>

To continue the review of the license termination request, please submit a written response to this letter by November 15, 2019. The response must be dated and signed by the licensee's representative with reference made to Mail Control Number 616009. To expedite the licensing process, you may fax your response to (630) 515-1078. If you have any questions or require clarification on any of the information stated above, you may contact me at (630) 829-9737 or Jason.Kelly@nrc.gov.

In accordance with 10 CFR §2.390 of the U.S. Nuclear Regulatory Commission's (NRC) "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M Kelly, MPH
