Reference: Oregon State University TRIGA Reactor (OSTR),  
Docket No. 50-243, License No. R-106

Subject: 10 CFR 50.54(q) Report of Changes to the OSTR Emergency Response Plan Which Do Not  
Decrease the Effectiveness of the Plan

All:

As a result of our annual review of the OSTR Emergency Response Plan, certain changes to the plan were determined to be necessary. This letter represents our formal report of the changes governed by 10 CFR 50.54(q). Based on our evaluation of these revisions, we have concluded that none of the specific changes in the attached enclosure reduces the effectiveness of the Plan.

All of the changes to the Plan have been reviewed and approved by the OSTR Reactor Operations Committee and OSTR staff. The new plan is included in the enclosure. In addition to the plan itself, a number of conforming changes were made to the Emergency Response Plan Implementing Procedures (ERIPs) in order to keep them up to date.

This letter replaces the previous letter sent on October 2<sup>nd</sup>. We neglected to send an enclosure containing the updated Emergency Response Plan, which is now included with this letter.

If you have any concerns or questions about the reported changes to the OSTR Emergency Response Plan, please let me know.

I declare under penalty of perjury that the foregoing is true and correct.

Yours sincerely,

Steve Reese  
Director
