Dear Ms. Disbrow:

This letter refers to the announced inspection conducted during September 11-13, 2019, at your facility in Anchorage, Alaska. The inspection was limited in scope, with a focus on certain activities related to your gamma stereotactic radiosurgery unit. Within the limited scope, the inspection examined activities conducted under your license as they relate to safety and security, to compliance with the U.S. Nuclear Regulatory Commission's (NRC's) rules and regulations, and with the conditions of your license. Within these areas, the inspection consisted of a selected examination of procedures and representative records, observations of facilities and equipment, independent radiation measurements, and interviews with personnel. The inspector discussed the preliminary inspection findings with Mr. Noah Arvidson and Mr. Bryan Jackson at the conclusion of the onsite portion of the inspection. A final exit briefing was conducted telephonically with Mr. Jackson on October 16, 2019.
