PG&E Letter DCL-19-086

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

10 CFR 50.90

Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
Supplement to "License Amendment Request 18-02, License Amendment
Request to Revise Technical Specification 5.6.5b, 'Core Operating Limits Report
(COLR)' for Full Spectrum Loss-of-Coolant Accident Methodology"

Reference: 1. PG&E Letter DCL-18-100, "License Amendment Request 18-02,
License Amendment Request to Revise Technical Specification
5.6.5b, 'Core Operating Limits Report (COLR)' for Full Spectrum
Loss-of-Coolant Accident Methodology," dated December 26,
2018 [ML19003A196]

Dear Commissioners and Staff:

In Reference 1, Pacific Gas and Electric Company (PG&E) submitted a license amendment request (LAR) to revise the Technical Specification 5.6.5b, "Core Operating Limits Report (COLR)" for the Westinghouse Full Spectrum™ Loss-of-Coolant Accident (FSLOCA™) Methodology. Attachment 4 to the Enclosure of Reference 1 provided the Updated Final Safety Analysis Report (UFSAR) changes associated with the FSLOCA™ analysis for information only.

During NRC staff review of the LAR (Reference 1), the staff identified an error in the UFSAR changes contained in Attachment 4. Specifically, in UFSAR Table 6.5-2, "Summary of Assumptions Auxiliary Feedwater [AFW] System Design Verification," line item e., "Decay Heat," column "Small Break Loss of Coolant Accident," the reference was revised from "Figure 15.1-7" to "Figure 15.1-6"; however Figure 15.1-6, "Residual Decay Heat (Best Estimate LBLOCA 1979 ANS Decay Heat)" was marked as being deleted.

The decay heat curve used in the FSLOCA™ analysis is described in Attachment 4 to the Enclosure of Reference 1 in UFSAR Section 15.1.10.1

(UFSAR page 15.1-14), "Fission Product Decay." Therefore, the correct reference for UFSAR Table 6.5-2, line item e., "Decay Heat," column "Small Break Loss of Coolant Accident," is "Section 15.1.10.1."

The UFSAR change described in this supplement does not impact the significant hazards consideration evaluation, Technical Specifications changes, or the Technical Specification Bases changes contained in Reference 1.

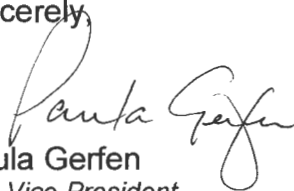

PG&E makes no new or revised regulatory commitments (as defined by NEI 99-04) in this letter.

If you have any questions or require additional information, please contact Mr. Hossein Hamzehee, Regulatory Services Manager, at (805) 545-4720.

I state under penalty of perjury that the foregoing is true and correct.

Executed on October 24, 2019.

Sincerely,

Paula Gerfen
