Containment Liner Test Channels

Gentlemen:

Enclosed are three (3) signed originals and thirty-seven (37) copies of a report titled, "Containment Liner Test Channel at Beaver Valley Power Station".

This report was prepared by the Stone and Webster Engineering Corporation and provides a technical basis for the validity of Type A containment leak rate tests which are performed with unvented test channels.

If you have any further questions in this matter, please contact my office.

Very truly yours,

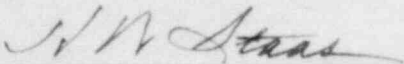

C. N. Dunn
Vice-President, Operations
