RE: File #1578-19 [Former File #2295-18]; CERT License Amendment for the Cimarron Fuel Facility
Decommissioning Plan for Groundwater Remediation, Logan County, Oklahoma

Dear Ms. Roman:

We have received and reviewed the documentation submitted on the referenced project. As indicated on the 1892 (revised 1922) Kingfisher, Oklahoma 1:125000 topographic map that was provided by Burns-McDonnell, a building is depicted within the location of the proposed project area. However, an examination of the information contained in the Oklahoma Landmarks Inventory (OLI) files and other materials on historic resources available in our office, identified no known historic properties within the referenced project's area of potential effect.

Therefore, because the 1892 map depicted a building located within the project area, thus indicating the potential for historic resources to be present, we remind you that in addition to our review, you must contact the Oklahoma Archeological Survey (OAS), 111 E. Chesapeake, #102, Norman OK 73019-5111 (#405/325-7211, FAX #405/325-7604), to obtain a determination about the presence of prehistoric resources that may be eligible for the National Register of Historic Places. Should the OAS conclude that there are no prehistoric archaeological sites or other types of "historic properties," as defined in 36 CFR Part 800.16(l), which are eligible for inclusion in the National Register of Historic Places within the project area and that such sites are unlikely to occur, we concur with that opinion.

The OAS may conclude that an on-site investigation of all or part of the project impact area is necessary to determine the presence of archaeological resources. In the event that such an investigation reveals the presence of prehistoric archaeological sites, we will defer to the judgment of the OAS concerning whether or not any of the resources should be considered "historic properties" under the Section 106 review process. If sites dating from the historic period are identified during the survey or are encountered during implementation of the project, additional assessments by the State Historic Preservation Office will be necessary.

Should further correspondence pertaining to this project be necessary, please reference the above underlined file number. If you have any questions, please contact Catharine M. Wood, Historical Archaeologist, at 405/521-6381. Thank you.

Sincerely,

Lynda Ozan
Deputy State Historic
Preservation Officer
