General Comment

As a stakeholder, I strongly oppose this proposal to allow near-surface disposal of Greater-than-Class-C (GTCC) waste. There is an existing Environmental Impact Statement (EIS) that already determined that "it is not generally acceptable for near surface disposal." This proposed rule directly threatens our public health by upending established principles of handling dangerous radioactive waste. The Nuclear Regulatory Commission is a publicly funded agency that must fulfill its mission to regulate the dangers of nuclear power to protect us! I demand that the NRC withdraw this proposal immediately!
