**RE: Delegation of Authority for Associate Radiation Safety Officer on
NRC License 24-15122-01**

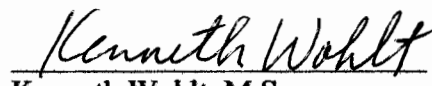

You have been appointed Associate Radiation Safety Officer (ARSO) and are responsible for ensuring safe use of radiation.

You are responsible for working with the RSO in managing the Radiation Protection Program, identifying radiation protection problems, initiating, recommending, or providing corrective actions, verifying implementation of corrective actions, stopping unsafe activities and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations whenever justified to maintain radiation safety. You are required to notify management of the staff who do not cooperate and do not address radiation safety issues. In addition, you are free to raise issues with the Nuclear Regulatory Commission at any time. We anticipate Associate Radiation Safety Officer duties will require 2-3 hours per week. We also anticipate emergency response times in the 2.5 hour range if needed onsite as well as email/phone support prior and or as needed.
