Director of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

Dear Sir:

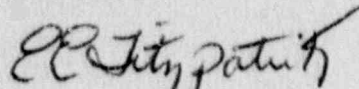

Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request No. 167, Rev. 1

Pursuant to 10 CFR 50.90, GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station (OCNGS), Provisional Operating License No. DPR-16, requested a change to Appendix A of that license by TSCR No. 167, dated March 22, 1988. This Technical Specification Change Request dealt with the replacement of organization charts in the Technical Specifications with more general organization requirements. The submittal was similar in content to the Shearon Harris Nuclear Power Plant, Docket 50-400, which was approved by the NRC as Amendment No. 3 on January 27, 1988.

In response to the recent NRC guidance issued by Generic Letter 88-06, GPUN is submitting TSCR 167, Rev 1, which supercedes in its entirety our submittal of March 22, 1988. Pursuant to 10 CFR 50.91(a)(1), we enclose our analyses, using the standards in 10 CFR 50.92 of significant hazards considerations. This change request has been reviewed in accordance with Section 6.5 of the Oyster Creek Technical Specifications, and we have concluded that this proposed change does not constitute a significant hazards consideration.

Pursuant to 10 CFR 50.91(b)(1), a copy of this change request has been sent to the State of New Jersey, Department of Environmental Protection. In addition, a check for \$150.00 was already enclosed for the fee application of 10 CFR 170.12.

Sincerely,

E. E. Fitzpatrick
Vice President & Director
Oyster Creek
