**Subject:** [External\_Sender] GTCC Waste Opposition to storage in West Texas and Eastern New Mexico  
**Date:** Tuesday, November 19, 2019 12:55:56 PM

---

To Whom It May Concern:

As a resident of Midland, Texas, I am opposed to allowing the storage of Greater Than Class C waste in the low level site currently in use in Andrews County, Texas, and the Holtec Site in Lea County New Mexico.

I am a geologist and scientist and am concerned that the storage of GTCC could have a detrimental impact on both the strategic oil reserves of the Permian Basin, as well as the aquifer that supplies water to the region and beyond.
