SECURITY INSPECTION REPORT 05000528/2019411, 05000529/2019411,
AND 05000530/2019411

Dear Mr. Bement:

On October 29, 2019, the U.S. Nuclear Regulatory Commission (NRC) completed an inspection at your Palo Verde Nuclear Generating Station, Units 1, 2, and 3. The NRC inspectors discussed the results of this inspection with Ms. Maria Lacal, Senior Vice President, Regulatory and Oversight, and other members of your staff. The results of this inspection are documented in the enclosed report.

NRC inspectors documented two findings of very low safety significance (Green) in this report. Both of these findings involved violations of NRC requirements. We are treating these violations as non-cited violations (NCVs) consistent with Section 2.3.2.a of the Enforcement Policy.

If you contest the violations or significance of these NCVs, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555-0001; with copies to the Regional Administrator, Region IV; the Director, Office of Enforcement; and the NRC resident inspectors at Palo Verde Nuclear Generating Station.

One cross-cutting aspect was assigned to a finding in the area of Human Performance, Resources, because leaders did not ensure that procedures were adequate to support nuclear safety [H.1].

Enclosure transmitted herewith
contains SUNSI. When
separated from enclosure, this
transmittal document is
decontrolled.

R. Bement
