SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-35384-01

By letter dated, September 20, 2019, informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The letter stated that all radioactive material had been transferred to C&J Spec-Rent Services, Inc. dba C&J Energy Services (NRC License No. 42-35281-01) as part of a merger.

The staff has reviewed the statements made in September 20, 2019, and NRC inspection reports. NRC license number 42-35384-01 authorizes work only at temporary job sites in NRC jurisdiction. Based on the statements made and a review of your historical file, the staff concluded that all NRC licensable radioactive material will be used under NRC License No. 42-35281-01. There are no field stations in NRC jurisdiction that need to be released for unrestricted use.

Please find enclosed Amendment No. 3 to License No. 42-35384-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22, as applicable.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1590 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Michelle R. Simmons, Senior Health Physicist
Materials Licensing and Decommissioning Branch
