Subject: LaSalle County Station Units 1 and 2
Supplemental Response Regarding
Seismic Qualification Review (Volume 7) -
Impedance Test Report
NRC Docket Nos. 50-373/374

Reference (1): L. O. DelGeorge letter to A. Schwencer dated
May 1, 1981.

Dear Mr. Schwencer:

Attached is Volume 7 of the LaSalle County Nuclear Station Equipment Qualification Post-Audit Documentation - Impedance Test Report. This submittal fulfills the commitment documented in Reference (1) to provide an evaluation of the adequacy of the dynamic modeling (SQRT) of LaSalle County Equipment through comparison with impedance test results.

Seventeen (17) items are addressed for which comparisons with the test results demonstrated design adequacy. Design changes are being completed for two items (E22-F012 and E22-F023) based on earlier analyses, now verified by the impedance testing. These latter two items have also been included in this report for completeness. Qualification of the as-modified design is now in progress, the results of which will be reported in the final SQRT Report to be submitted.

A copy of the attached report was provided to Mr. K. Singh of EG&G on June 2, 1981. Therefore, three (3) copies are being provided to your office with no further transmittal to your consultant.

In the event you have any further questions, please direct them to this office. Completion of the LaSalle County SQRT program remains on the schedule defined in Reference (1).

Very truly yours

L. O. DelGeorge
Nuclear Licensing Administrator
